Q	endministrator@Arch- User Commands	Q	endministrator@Arch- User Commands
ls(1)	ls(1)	cp(1)	cp(1)
NAME	ls - list directory contents	NAME	cp - copy files and directories
SYNOPSIS	ls [OPTION]... [FILE]...	SYNOPSIS	cp [OPTION]... [-I] SOURCE DEST cp [OPTION]... SOURCE... -R DIRECTORY cp [OPTION]... -S SOURCE1 SOURCE2...
DESCRIPTION	List information about the files (the current directory by default). Sort entries alphabetically if none of -eftuSW nor --sort is specified. Mandatory arguments to long options are mandatory for short options too. -h, --all do not ignore entries starting with . -l, --almost-all do not list implied . and .. --author with -l, print the author of each file -b, --escape print C-style escapes for nongraphic characters -k, --block-size=SIZE with -l, print sizes by SIZE when printing them; e.g., -k=human-readable; see SIZE format below -d, --ignore-backups do not list implied entries ending with ~ -t, --time [-t, sort by, and show, column (line of last change of file status information); with -l: show ctime and sort by name; with -drwx: sort by time, newest first	DESCRIPTION	Copy SOURCE to DEST, or multiple SOURCE(s) to DIRECTORY. Mandatory arguments to long options are mandatory for short options too. -h, --archive same as -R --preserve=all --attributes-only don't copy the file data, just the attributes --backup[=CONTROL] make a backup of each existing destination file -b like --backup but does not accept an argument --copy-contents copy contents of special files when recursive -d same as --no-dereference --preserve=links --debug explain how a file is copied. Implies -v -i, --interactive prompt before every file that is about to be overwritten

5. Soal 9 – 10

Q	endministrator@Arch- User Commands	Q	endministrator@Arch- User Commands
cat(1)	cat(1)	cat(1)	cat(1)
SYNOPSIS	cat [OPTION]... FILE...	SYNOPSIS	cat [OPTION]... FILE...
DESCRIPTION	Concatenate the FILEs (one per line) to standard output. Mandatory arguments to long options are mandatory for short options too. -h, --help display this help message -n, --number number each output line, starting from line 1 -b, --number-nonblank number only non-blank output lines, starting from line 1 -s, --squeeze-blank suppress repeated blank output lines -E, --show-ends show end of file, with a \$ at the end of each line -T, --show-tabs show tabs, with a ^I at the start of each line -v, --show-nonprinting show non-printing characters, with a backslash and the appropriate octal escape sequence -w, --width=COLS set the output width to COLS. If COLS is zero, the output width is the width of the terminal (if set) or 80 columns	SYNOPSIS	cat [OPTION]... FILE...
OPTIONS	-h, --help display this help message -n, --number number each output line, starting from line 1 -b, --number-nonblank number only non-blank output lines, starting from line 1 -s, --squeeze-blank suppress repeated blank output lines -E, --show-ends show end of file, with a \$ at the end of each line -T, --show-tabs show tabs, with a ^I at the start of each line -v, --show-nonprinting show non-printing characters, with a backslash and the appropriate octal escape sequence -w, --width=COLS set the output width to COLS. If COLS is zero, the output width is the width of the terminal (if set) or 80 columns	OPTIONS	-h, --help display this help message -n, --number number each output line, starting from line 1 -b, --number-nonblank number only non-blank output lines, starting from line 1 -s, --squeeze-blank suppress repeated blank output lines -E, --show-ends show end of file, with a \$ at the end of each line -T, --show-tabs show tabs, with a ^I at the start of each line -v, --show-nonprinting show non-printing characters, with a backslash and the appropriate octal escape sequence -w, --width=COLS set the output width to COLS. If COLS is zero, the output width is the width of the terminal (if set) or 80 columns
